

3x4 CR2032 Coin Cell Battery Module v1.4

A Lego-compatible Crazy Circuits module.

This is a holder for a 3V CR2032 coin cell battery. The extra three pads on the bottom make it usable with Crazy-compatible magnets.

Manufacturing Notes

This board must be v-scored. Do not panelize with support tabs or mousebites.

The central rectangular ground pad should be tinned (flood filled) with solder to at least as high as flush with the solder mask, to ensure a good connection with the coin cell battery.
